About This Content

Yogscast, the UK's most watched YouTube channel, run an annual charity drive for the month of December. This year, they are teaming up with SEGA and taking the drive to the next level in a race against the fastest Hedgehog in the world. The Yogscast's very own Simon Lane, aka Honeydew, is now available as a brand new DLC character in Sonic & All-Stars Racing Transformed™ with 100% of all SEGA and Yogscast proceeds being donated to the SpecialEffect charity.

For more information about Special Effect and the fantastic work that they do, please visit their main website, www.specialeffect.org.uk.

Graphics: 256MB with Shader Model 3.0 support

DirectX®: 9.0c

Hard Drive: 6.7GB free hard drive space

Sound: DirectX 9 Compatible

English, German, French, Italian

sonic and all-stars racing transformed - yogscast dlc

bring back fb game nostalgia

-very slow pace combat simulation, no fast forward or speed option

-wait or p2w elements

-ur pc notification bar will be full of decoder icon, bad game engine. Well worth the money, Super easy to use and the output is great. Would recommend to anyone.. very minimalistic game - logic and jumping puzzle based - very relaxed with nice tronesque aesthetics - i like it cos it just so different from all the other games i play and is very relaxing - most of the time i have no idea what to do but the views in paces are great. This is a hectic and fun game when you play it alone. It's probably even more of that when you play with more people!. A good worms game but the multiplayer is not existent anymore.. I love the program, but it makes my cpu run slow, and I can only use it with my mouse. For some reason, it throws the cursor off screen. I still recommend it. Just because it won't work on my computer doesn't mean it won't work on another. It's a very good software, and more affordable than Photoshop CS6. Get it when ever it's on sale. Trust me, it'll be worth it.. This game is simple in terms of the features it offers, but it is so amazing at making me feel like I really am out on the mountain. I have always been a huge fan of skate and snowboard games, and the gameplay that The Snowboard Game offers is on par even with SKATE 3. Compared to other snowboarding games like Infinite Air, the handling here is just on another level. I immediately got addicted and it only took a few hours for me to get my \$15 worth. I sincerely appreciate what this game offers and really hope that development continues because its pontential is astronomical.. Nice card game for those who loved Astral Tournament/Astral Masters/Spectromancer back in 00's

Ok, I visited the three locations now. I think it's a nice concept and it makes fun so far. You can't expect too much, but the dev is honest and wrote a good description what he is planing here on the store page.

Actual status: "Early Access will allow players to hop into the MageWorks world in its current form as a magic playground to casually test spells and explore environments."

If he is honest with one year of development until leaving the Early Access status and if he is using this time good it could get a really great game I think. I liked it more than A Legend of Luca because the environment is really nice and it has some hard to describe fun factor for me.

But again, it's Early Access, you can't even fight atm with the enemies. The enemies direct outside of the castle are only targets for testing spells. The others in the first place also, in the second place they notice you but are shooting in a different direction and in the third one they come and beat you but they are not making damage. But the fight system is really nice and the spells are cool and well made. Made a lot of fun and I'm really looking forward to play the finished game.

Pro

- nice environment
- nice spells and good targeting
- cool concept
- it's hard to describe, I liked the way it is :-)

Contra

- short and not much content atm

Possible bugs

- had some stuttering, but Steam VR was making problems half of the day, so maybe no problem for you
- I fallen two times in the floor while teleporting back to castle

I will keep it and hope that the dev is nobody that is making cash and then doesn't deliver more content. If you want to play a game NOW don't buy it. If you want to support the dev and giving him the possibility to hopefully put more time on it you can give it a try if you ask me.. The reason why I recommend this game is not because its fun or somethin like that, its just because of the amount of achivements and i'd recommend to buy the whole game series.. Bummer! World War III happened and killed most of the world's population. The ones that got toasted were the lucky ones. Survivors live in constant fear of being murdered or enslaved by violent gangs, renegade military units and, of course; mutants.

Outfitted with a heavily armored car, unlimited firepower and a thirst for vengeance, our Heroine – the Wasteland Angel roams the radioactive wastes, travelling from one God-forsaken town to the next, protecting survivors from being enslaved. She's on a mission, to defend those that can't defend themselves.

Wasteland Angel is a throw-back to the era of vintage arcade shooters, where players fend off waves of enemies and ultimately face-off against epic end-level bosses. From a top-down isometric view, players pilot the Wasteland Angel's overpowered vehicle as its dual machine guns cut a swath across the terrain. To handle whatever the gangs, muties and renegades throws her way, Wasteland Angel has upgradeable weapons and ammo that can rip enemies from this life and toss them into the next.. Excellent game - real in a way that many game narratives are not. Characters are relatable and the injustices and challenges they face are extremely pertinent to our times. Don't expect a huge amount of player agency! You're along for the ride and get to steer the boat a bit, and that's ok.. Like Gradius? Like Raiden? Like UN Squadron? Buy it.
